

MOUSSAB AHMAT MAHAMAT

AI Designer | Data Scientist | Machine Learning Engineer

N'Djamena, Chad • +235 61 97 59 72 • mahamatkahir100@gmail.com

moussab-ahmat.github.io • github.com/moussabahmat

PROFESSIONAL SUMMARY

Computer engineer and data scientist specialized in machine learning, deep learning and predictive modeling. Experienced in building and deploying intelligent systems end-to-end — from data collection and processing to model design, evaluation and production deployment via APIs and containers. Skilled in conducting business and technical studies, consulting with clients to determine requirements, uncovering patterns in large datasets, and communicating analytical solutions to both technical and business audiences. Strong foundation in big data tools, cloud platforms and MLOps.

TECHNICAL SKILLS

Programming & ML: Python, C++, Java, SQL, TensorFlow, Keras, Scikit-learn, PyTorch

Big Data & Cloud: Hadoop, Spark, Airflow, AWS, GCP

Databases: PostgreSQL, MySQL, MongoDB

DevOps & Deployment: Docker, Kubernetes, FastAPI, Flask, Streamlit

PROFESSIONAL EXPERIENCE

IT Consultant

Jan. 2025 – Mar. 2026

Sky Telecom Technology SARL • N'Djamena, Chad

- Analyzed clients' information technology and data requirements and conducted business and technical studies to support implementation and migration decisions.
- Designed and deployed data-driven and analytical solutions for business clients, defining technical requirements and documentation.
- Communicated the business and technical benefits of solutions to both technical and non-technical stakeholders.
- Provided expert advice, diagnosed incidents and coordinated with technical teams to ensure quality and continuity of service.

Data Scientist — Fraud Detection

Feb. 2024 – Jun. 2024

STB Bank • Tunis, Tunisia

- Built predictive models to detect fraudulent transactions in critical transactional systems, uncovering patterns in large data volumes.
- Designed data collection and processing methods, and developed data pipelines and REST APIs to serve model outputs.
- Deployed containerized ML services (Docker) optimized for performance, reliability and low false-positive rates.

Software Engineering Intern

Nov. 2022 – Jan. 2023

ONPF • Tunis, Tunisia

- Developed a land-records management platform and designed the underlying relational database schema and data-access rules.

SELECTED PROJECTS

Fraud Detection System

Built an intelligent fraud-detection system using deep learning with an interactive web interface for individual and batch predictions. Implemented advanced neural-network architectures to identify fraudulent transactions in real time, achieving high accuracy and low false-positive rates.

Churn ML — Customer Churn Prediction

Developed an ML web application predicting bank customer churn with deep learning. Created predictive models to identify at-risk customers for proactive retention, with an intuitive interface for business users to input data and receive churn-probability predictions.

Conversational Chatbot (NLP)

Designed and developed a conversational chatbot using TensorFlow and Keras. Trained neural-network models on dialogue datasets with an interactive interface, optimizing the model to improve response relevance and fluidity.

Movie Recommendation System

Built a personalized recommendation system using PySpark and Spark MLlib. Applied collaborative filtering and machine learning to tailor suggestions, processing large data volumes via Spark APIs and evaluating results with precision and coverage metrics.

EDUCATION

Engineering Degree (Bac+5) in Computer Engineering

2021 – 2024

École Centrale Polytechnique — Tunis, Tunisia

CERTIFICATIONS

- Deep Learning Specialization — DeepLearning.AI (Feb. 2025): Neural Networks, CNN, NLP.
- Machine Learning Specialization — DeepLearning.AI & Stanford (Oct. 2024): Supervised, Unsupervised & Deep Learning.
- IBM Big Data Engineer Certificate (Feb. 2024): Hadoop, Spark and ML tools.
- Honoris 21st Century Skills Certificate (May 2024): Critical Thinking, Data Analysis, Communication.

LANGUAGES

French: Bilingual (TEF Canada C1) English: Professional working proficiency Arabic: Bilingual

PROFESSIONAL EXPERIENCE

Cofounder - OYO Global Business

Apr. 2026 - Present

Digital services, software & web development - N'Djamena, Chad

- Co-founded a digital services company, leading technical direction and client relationships.
- Designed and developed school management software for educational institutions.
- Developed an e-commerce platform with catalog, cart, and order management.
